Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 24, and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Ette (US 787,160).

Ette discloses all the recited elements of the invention including a first housing plate (2), a second housing plate (3), and a plurality of shafts (4). Regarding claim 2, an aperture (Figure 3). Regarding claim 3, the aperture is capable of receiving a rotating arbor.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ette.

Ette discloses the invention substantially as claimed except for the aperture including a recess or a key. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a recess or a key on the aperture of Ette since the examiner takes Official Notice on the use of recess or

Art Unit: 3724

key as old and well known in the art for the purpose of non-rotatably interlocking the spacer and a shaft. Examples are shown on Herman, Gosnell, Frew et al., and Thomas.

5. Claims 8-18 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art (hereafter AAPA) in view of Ette.

AAPA discloses the invention substantially as claimed except for a spacer comprising housing plates maintaining a predetermined distance away from each other by a plurality of shafts. Ette discloses a spacer comprising housing plates (2, 3) maintaining a predetermined distance away from each other by a plurality of shafts (4). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a spacer as taught by Ette on the device of AAPA in order to provide a spacer that is light weight with strength. Furthermore, AAPA fails to teach first, second, and third engagement elements comprising a slot or a key. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a recess or a key on the modified device of AAPA since the examiner takes Official Notice on the use of recess or key as old and well known in the art for the purpose of non-rotatably interlocking the spacer and a shaft. Examples are shown on Herman, Gosnell, Frew et al., and Thomas.

Response to Arguments

6. Applicant's arguments with respect to claims 1-18 and 24-26 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Art Unit: 3724

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Frew et al. and Thomas are cited to show related devices.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Choi whose telephone number is 571-272-4504. The examiner can normally be reached on Monday-Friday 9:00-3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 571-272-4514. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
